Northwind Systems
Annual Report 2024

Letter from the Chief Executive Officer

Dear shareholders, 2024 was a record year for Northwind Systems. Revenue grew by 12% to 482 million euros, driven above all by our cloud platform, which won more than 400 new enterprise customers.

Our workforce grew to 3,150 employees in 14 countries. We also reduced the carbon emissions of our own operations by 18% compared with 2023.

Given this strong result, the Board proposes a dividend of 1.20 euros per share for 2024, up from 1.05 euros for 2023.

Maria Lindqvist, Chief Executive Officer

Consolidated income statement

All amounts in EUR million unless stated otherwise.

Item	2023	2024
Revenue	430	482
Gross profit	241	275
Operating income (EBIT)	58	71
Net income	41	52
Earnings per share (EUR)	2.05	2.60

The gross margin improved from 56.0% to 57.1% because cloud subscriptions carry higher margins than hardware. The EBIT margin rose from 13.5% to 14.7%.

Revenue by segment

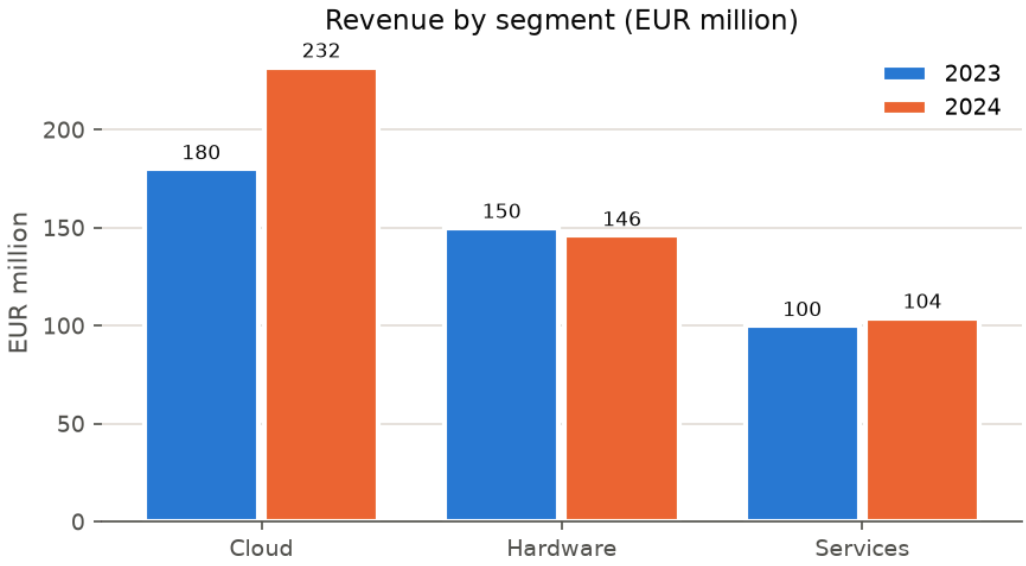

Figure 2: Revenue by business segment, 2023 and 2024 (EUR million).

Cloud became our largest segment, with revenue of 232 million euros or 48% of the group total. Hardware revenue declined by 3% as customers moved to cloud services.

Regional performance

Region	Revenue 2024 (EUR million)	Growth vs 2023
Europe	241	9%
North America	145	15%
Asia-Pacific	96	17%

Asia-Pacific was our fastest-growing region. We opened a new regional office in Singapore in March 2024 to serve customers in South-East Asia.

Risks and outlook

The main risks to our business are shortages of electronic components, movements in the US dollar exchange rate and cybersecurity threats against our cloud platform.

For 2025 we expect revenue between 520 and 540 million euros and an EBIT margin of about 15%. Capital expenditure is planned at 35 million euros, mainly for two new data centres in Frankfurt and Dublin.
